

Good for the Economy.
Good for the Environment.

Dear President Biden and Members of Congress,

As members and supporters of E2 (Environmental Entrepreneurs), we are writing to thank you for your support of the Inflation Reduction Act of 2022. As representatives of the business community, we know that we need to tackle the rising costs of climate change and that every state benefits from investments in clean energy. That is why the bold and historic investments in this bill are a win for the economy and the planet.

E2 is a national, nonpartisan group of more than 11,000 business leaders, investors, and other professionals from every sector of the economy who advocate for smart policies that are good for the economy and good for the environment. Our members have founded or funded more than 2,500 companies and created more than 600,000 jobs.

According to E2's Clean Jobs America report released in August 2022, there are 3.2 million Americans working in clean energy. This act sends a strong market signal to the clean energy industry to continue to grow and develop long-term business plans to expand career opportunities in all 50 states.

Expanding clean energy programs and clean transportation opportunities for homes and businesses is an economic win for the country. The Inflation Reduction Act makes critical investments in clean energy, clean vehicles, research and development and other essential climate programs.

Thank you again for your support of this historic piece of legislation. This law will allow us to tackle the growing costs of climate change; create millions of good paying jobs; drive billions in private investments; and ensure America can compete in the global marketplace—all while improving American energy security and saving Americans money.

Thank you again for your support. We look forward to working with your offices in the future as we continue to chart a course towards a clean energy future.

Sincerely

Dan Abrams
